

COMPACT
Between the
Office Of Management and Budget
and the
U.S. Government Printing Office

The Office of Management and Budget (OMB) and the U.S. Government Printing Office (GPO) share certain common goals. Both agencies seek to develop a mechanism that will allow Federal agencies direct access to printing vendors for the purpose of placing printing orders, while at the same time enabling the GPO to meet its statutory requirements. Both agencies seek to reduce the cost of Federal printing and to ensure the permanent public access to all non-classified government publications.

In furtherance of these goals OMB and GPO agree to take the following steps:

By October 1, 2003, GPO will develop a demonstration print procurement contract, similar to a GSA Federal Supply Schedule, for a Federal department or agency of OMB's choosing. The contract will feature a front-end electronic system utilizing the World Wide Web that will allow federal customers a one-stop, integrated, print ordering and invoicing system for all print jobs. Any registered printer in the country would be free to submit a price quote on any job placed in the system. The federal customer would then select a printer, using either lowest price or best value techniques.

In support of this contract, GPO will register and qualify printers for participation in the contract and offer 24/7 customer and printer support. In addition, GPO will offer, on a cost recovery basis, additional printing procurement services, including responsibility determination, specification development, technical and design assistance and press inspections.

Agencies will have authority to address issues of quality, time of delivery, and other performance issues directly with the printers they select. Payments will be routed through GPO to private printers, with agencies approving them before they are made.

Vendors participating in the contract would pledge to provide their "most favored customer pricing" to Federal customers and offer a 3% trade discount, during the demonstration project, to fund the operating costs of the contract. The amount of the trade discount once deployed government wide will be reviewed for possible future reduction. The Superintendent of Documents, at its expense, will continue to have access to publications produced under this contract for public distribution. As a condition of payment, vendors would be required to provide GPO with one electronic version of every document ordered under the contract in a format acceptable to GPO and two paper copies, in order to meet the requirements of Chapter 19 of Title 44, U.S. Code.

To ensure that agency printing work is channeled through the new competitive procurement process, the Executive Branch will substantially limit the circumstances where agencies may rely on in-house or other Executive Branch printing operations. OMB will seek audits and, where appropriate, review by Inspectors General.

A demonstration project will begin in FY2004, and the competitive procurement process will be deployed government-wide in FY2005.

OMB and GPO will work with the FAR Council to ensure that appropriate regulatory changes are made to reflect these new arrangements.
